6 Images

You may find it too time-consuming to do parts of your assignment in LaTeX, at which point you may want to include an image of your work. LaTeX also supports images. Please keep your image sizes small both for this assignment and future assignments, the total file-size should be at most 5MB. However, be sure that your images can be easily read by your markers, or you run the risk of losing marks.

For this question, include an image of the animal you added to the table in Q5 along with a caption (see example below).

Figure 1: Polar Bear.

Figure 2: Panda.

Hint: (`figure` is a floating environment that gets put where it nicely fits the page layout. The optional argument says which positions are acceptable for the float: <u>t</u>op/<u>b</u>ottom of a page, <u>h</u>ere, and on a separate <u>p</u>age of floats.)
